

# Surgical Masks & N95 Respirators

High Quality Personal Protective Equipment

**MADE IN USA**

DemeTECH is a world renowned leader in wound closure medical devices with over 20 years experience in over 130 global healthcare markets. DemeTECH's newest product line focuses on PPE, using only the highest grade American sourced materials. All of DemeTECH's PPE offerings are manufactured using state of the art machinery and FDA compliant manufacturing processes.

Technical Information  
Understanding PPE

## How ASTM sets the standard

ASTM defines more than 12,500 international standards for safety and quality cross a wide variety of industries and services. Healthcare organizations globally adopt ASTM recommendations to implement best practices.

### **For masks, ASTM sets three levels of barrier protection:**

**Level 1:** Low barrier protection: generally used for short procedures and exams that don't involve aerosols, spray or fluids.

**Level 2:** Moderate barrier protection: for low to moderate levels of aerosols, spray and/or fluids.

**Level 3:** Maximum barrier protection: for heavy levels of aerosols, spray and/or fluids.

To determine if a mask is Level 1, 2 or 3, ASTM evaluates several characteristics, including bacterial filtration efficiency, sub-micron particulate filtration, differential pressure and flame spread. The greatest difference between the three levels is in the mask's resistance to penetration by synthetic blood.

## How are masks typically selected today?

According to a recent survey conducted among hundreds of operating room nurses, non-OR nurses, infection control practitioners and other clinicians, the most influential factor when selecting a mask is simply what's available at the facility. Following that are training, comfort and habit. Only 44 percent of survey respondents ranked ASTM standards as an influencer and that leads to a significant safety issue.

According to the same study, 75 percent of participants use the incorrect PPE for the procedure or setting. That may lead not only to staff and patient health risks, but also regulatory citations and fines. Following ASTM standards would help solve the problem, but awareness of them is low:

- 48 percent of OR staff are unaware of ASTM standards and the different levels of protection.
- 57 percent of face mask units sold in 2016 did not have or claim an ASTM rating.

While 84 percent of facilities surveyed have a mask selection protocol, more than half of clinicians said they use their medical judgment when selecting a mask—even if that falls outside the protocol. The encouraging news is that 95 percent of those surveyed said they would change their selection if they had higher awareness of ASTM standards.

### Choosing the right mask

#### A guide to ASTM barrier protection standards

#### 1 Procedure masks

Two ear loops secure mask to face.  
Not suitable for OR.  
Mainly used for patient examinations

#### 2 Surgical masks

Primarily used by OR staff.  
Intended for a high risk of fluid exposure.

#### 3 Surgical N95 respirator

Protection against residual surgical smoke or on patients with known or suspected aerosol transmittable diseases  
Used for situations where interacting with patients that may have airborne infectious disease

# Understanding ASTM levels of protection is Key

Codes	ASTM F2100-11 Levels	Characteristics	Resistance to penetration by synthetic blood, minimum pressure in mm Hg for pass result	Differential pressure, mm H <sub>2</sub> O/cm <sup>2</sup> (Breathability)	Bacterial filtration efficiency	Sub-micron particulates filtration efficient at 0.1 micron	Flame spread
DT-MSK-001	<b>Level 1: Low barrier protection</b> General use for short procedures and exams that don't involve aerosols, spray or fluids		80 mm Hg	<4.0	≥95%	≥95%	Class1
DT-MSK-002	<b>Level 2: Moderate barrier protection</b> For low to moderate levels of aerosols, spray and/or fluids		120 mm Hg	<5.0	≥98%	≥98%	Class1
DT-MSK-003	<b>Level 3: Maximum barrier protection</b> For heavy levels of aerosols, spray and/or fluids		160 mm Hg	<5.0	≥98%	≥98%	Class1

## Surgical Masks

ASTM Level 3

Disposable surgical masks for use in environments with high risk of fluid exposure. With Bacterial Filtration Efficiency (BFE) and Particle Filtration Efficiency (PFE) at 98% with 0.1 micron, you are assured a high level of protection against potential sources of infection

DemeMASK™

Surgical MASK

**FDA Clearance: K201479**

# DemeMASK™

## Surgical Mask MSK-003

FDA Clearance: K201479

### Level 3 Surgical Mask

ASTM Level 3 Masks feature a highly protective three layer construction, giving you protection, breathability, and comfort in the OR.

#### THREE LAYER FILTER PROTECTION

**Non-Woven  
Protective Layer**

Blue outer layer ensures proper wear, and provides high protection against fluids, high breathability, and excellent protection against airborne bacteria.

**Filter Layer**

Provides at least 98% filtration against airborne particles and bacteria.

**Inner Comfort Layer**

Enables wearers to comfortably wear mask for extended periods of time.

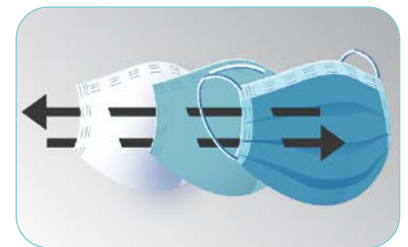

# High Protection across all devices

## Providing Your Staff With Superb Comfort, Comfort, without sacrificing reliable protection

At DemeTECH, we continually work with excellent quality materials, every mask is manufactured with the wearers protection in mind. The result is a highly protective surgical mask, with excellent comfort and world class protection.

### Comfort

- Superb breathability – While filtering harmful bacteria, our masks allow for easy air flow in both directions, do the wearer stays cool and comfortable.

Bi-Directional Air Flow

### Innovation

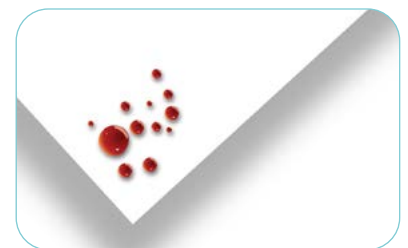

- Unique Device coding system to ensure staff knows which mask to use

A revolutionary new way to fight viruses

### Protection

- Filtration Efficiency: DemeTECH masks meet the bacterial filtration efficiency and differential pressure standards set forth in "ASTM F2100 Standard Specification for the performance of Materials Used in Medical Facial Masks"
- Fluid Protection - Choose from three levels of fluid resistance: 80mmHg, 120mmHg, and 160mmHg.

High Levels of fluid resistance against blood and other airborne bodily fluids

DemeMASK™

# Surgical Mask with Horizontal Tie

# DemeMASK™

## Surgical Mask MSK-003T

### Level 3 Surgical Mask Tie

ASTM Level 3 masks feature a highly protective three-layer construction, tie-down on the two upper and lower bands, providing you with protection, breathability, and comfort.

#### THREE LAYER FILTER PROTECTION

##### Non-Woven Protective Layer

Blue outer layer ensures proper wear, and provides high protection against fluids, high breathability, and excellent protection against airborne bacteria.

##### Filter Layer

Provides at least 98% filtration against airborne particles and bacteria.

##### Inner Comfort Layer

Enables wearers to comfortably wear mask for extended periods of time.

DemeMASK™

N95 Respirator Cup Style

**NIOSH**® #TC-84A-9258

# DemeMASK™

## N95 Surgical Cup Respirators

### How is it different?

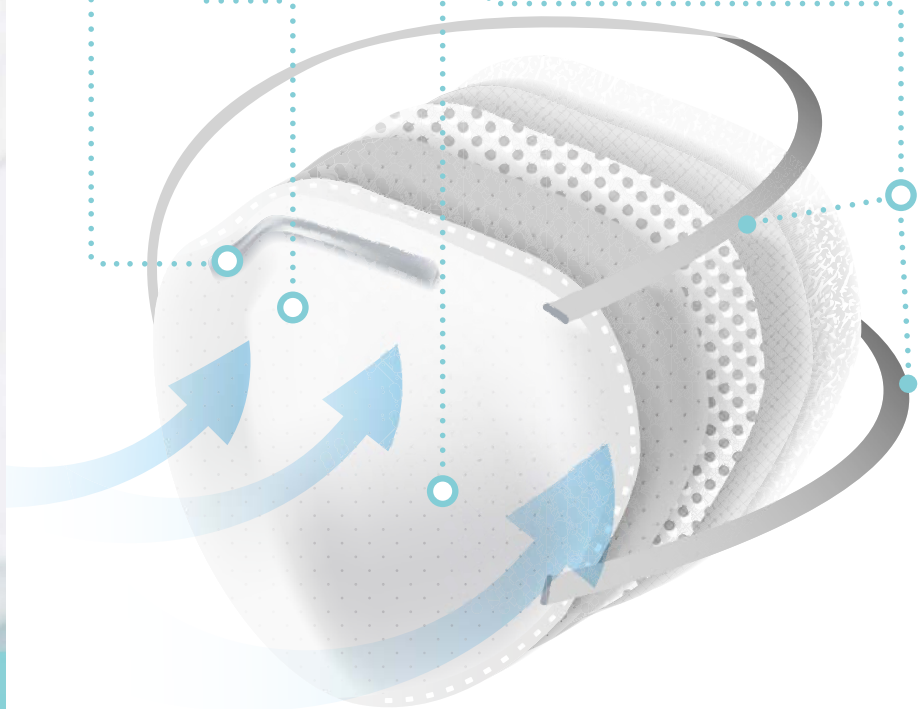

#### The highest Level of Protection

**Adjustable nose clip:** Helps provide a secure fit

**Padded Inner foam:** Provides comfort for long hours of wear

**Advanced electrostatic media:** Designed to provide at least 95% filtration efficiency against certain non-oil based particles.

**Dual Strap Design:** Double point welded headbands provide a secure seal around the wearers face

**5 LAYER PROTECTION**

## N95 Cup Respirators

Offered in a small and large size, the N95 Cup is designed to comfortably fit most facial shapes. This respirator is designed for use for particles such as those from grinding, sanding, sweeping, sawing, bagging, or other dusty operations. This respirator can also help reduce inhalation exposures to certain airborne biological particles (examples: mold, Bacillus anthracis, Mycobacterium tuberculosis), but cannot eliminate the risk of contracting infection, illness, or disease. The fitted mask adapts to the natural shape of the face, minimizing pressure points. The molded nose bridge reduces the adjustments needed to achieve a proper fit and provides a secure seal.

### Industries & applications

- Healthcare
- Cutting or Sanding Wood
- General Manufacturing
- Agriculture and Farming

### Features & benefits

- Exclusive design that minimizes the pressure points and fits comfortably on most faces
- Highly protective filter media protects against at least 95% of certain non-oil based particles.
- Strong, rigid outer shell prevents masks from collapsing on the wearers face
- Dual welded head straps secure the respirator comfortably on the user's face
- Latex free woven head straps secure the mask on the wearers face

DemeMASK™

Surgical N95 Cup Respirator

**NIOSH**® #TC-84A-9296

# Surgical N95 Cup Respirator

The DemeMASK Surgical N95 Respirator is designed to help provide respiratory protection for the wearer. This respirator has a filter efficiency level of at least 95% against particulate aerosols free of oil. It is fluid resistant. It is disposable and may be worn in surgery. It can fit a wide range of face sizes. This product contains no components made from natural rubber latex.

This product meets CDC guidelines for M.tuberculosis exposure control. As a respirator, it is intended to help reduce wearer exposure to certain airborne particles, including those generated by electrocautery, laser surgery, and other powered medical instruments. As a surgical mask, it is designed to be fluid resistant to splash and spatter of blood and other infectious materials.

## Features & benefits

- Exclusive design that minimizes the pressure points and fits comfortably on most faces
- Highly protective filter media protects against at least 95% of certain non-oil based particles.
- Strong, rigid outer shell prevents masks from collapsing on the wearers face

- 2 adjustment bands
- The high-density polypropylene outer layer provides strong resistance against liquids
- The soft polypropylene inner layer provides comfort for long periods of use

DemeMASK™

Green Disposable Face Mask

**ASTM Level 3**

## Green disposable Face Mask

The DemeMASK disposable face mask is a fantastic protective barrier against external pathogens. It is recommended for use in common environments such as school, work or the supermarket. If the contaminants are more dangerous to health, a respirator should be used.

- DemeTECH’s Green Face mask is manufactured using the highest quality of American made materials, and 100% manufactured in The United States.
- The DemeTECH Green Mask is made with the same materials as other DemeTECH Surgical Mask.
- Adjustable to the nose with a mouldable aluminum strap and rubber grip for greater comfort, without squeezing or leaving marks on the skin. All four edges of the mask are heat sealed for superior tear resistance.

Green Disposable Face Mask

Product Number	Type	Valve	Nose Clip	Strap Style	Strap Material	Box Qty
DT-MSK-GR	Disposable	NO	YES	Earloops	Latex Free Elastic	50 Units

### Technical specifications

- ASTM Level 3
- 3 protective layers filter >98% Particulates
- The edges of the mask are heat sealed
- 2 adjustment bands
- The high-density polypropylene outer layer provides strong resistance against liquids
- The soft polypropylene inner layer provides comfort for long periods of use

Particulate Respirator

**White Color - ASTM Level 3**

**Extra Small**

## Particulate Respirator - White Color - Extra Small

DemeTECH has released its D95 Particulate Respirator with Ear loops. This respirator was created in response to market demand for a particulate respirator with ear loops. The DemeTECH D95 Particulate Respirator Fold Style meets the specifications for particle filtration efficiency, inhalation and exhalation as outlined in 42 CFR 84.

### ASTM LEVEL 3

#### D95 White Particulate Respirator Fold Style with white earloops

**Product Number:** DT-DX95-XS-WHITE-WHITE

**Type:** Disposable Respirator

**Nose Clip:** Yes

**Strap Style:** Ear loops Welded

**Strap Material:** Latex Free Elastic

**Box Qty:** 20 Units

### TECHNICAL CHARACTERISTICS

**Ultra Comfort Earloops:** Dual Welded Earloops provide comfort for prolonged periods of wear.

**Nose Clip:** Made of moldable aluminum and rubber grip for greater comfort, without squeezing or leaving marks on the skin.

**Heat Seal:** The edges of the respirator are heat sealed for superior tear resistance.

**5 Protectives layers:** The respirator is made up of 5 layers, with 2 filtration layers that filter > 98% of all particles in the air.

**Soft Inner Layer:** The soft polypropylene inner layer provides comfort for long periods of use.

**Resistant Outer Layer:** The high-density polypropylene outer layer provides strong resistance against liquids in the air.

**Manufacturer:** It is made in the USA with materials of the highest quality by DemeTECH.

DemeMASK™

Particulate Respirator

**Blue Color - ASTM Level 3**

**Extra Small**

## Particulate Respirator - Blue Color - Extra Small

DemeTECH has released its D95 Particulate Respirator with Ear loops. This respirator was created in response to market demand for a particulate respirator with ear loops. The DemeTECH D95 Particulate Respirator Fold Style meets the specifications for particle filtration efficiency, inhalation and exhalation as outlined in 42 CFR 84.

### ASTM LEVEL 3

#### D95 Blue Particulate Respirator Fold Style with white earloops

**Product Number:** DT-DX95-XS-BLUE-WHITE

**Type:** Disposable Respirator

**Nose Clip:** Yes

**Strap Style:** Ear loops Welded

**Strap Material:** Latex Free Elastic

**Box Qty:** 20 Units

### TECHNICAL CHARACTERISTICS

**Ultra Comfort Earloops:** Dual Welded Earloops provide comfort for prolonged periods of wear.

**Nose Clip:** Made of moldable aluminum and rubber grip for greater comfort, without squeezing or leaving marks on the skin.

**Heat Seal:** The edges of the respirator are heat sealed for superior tear resistance.

**5 Protectives layers:** The respirator is made up of 5 layers, with 2 filtration layers that filter > 98% of all particles in the air.

**Soft Inner Layer:** The soft polypropylene inner layer provides comfort for long periods of use.

**Resistant Outer Layer:** The high-density polypropylene outer layer provides strong resistance against liquids in the air.

**Manufacturer:** It is made in the USA with materials of the highest quality by DemeTECH.

## Disposable Small and Childrens Face mask

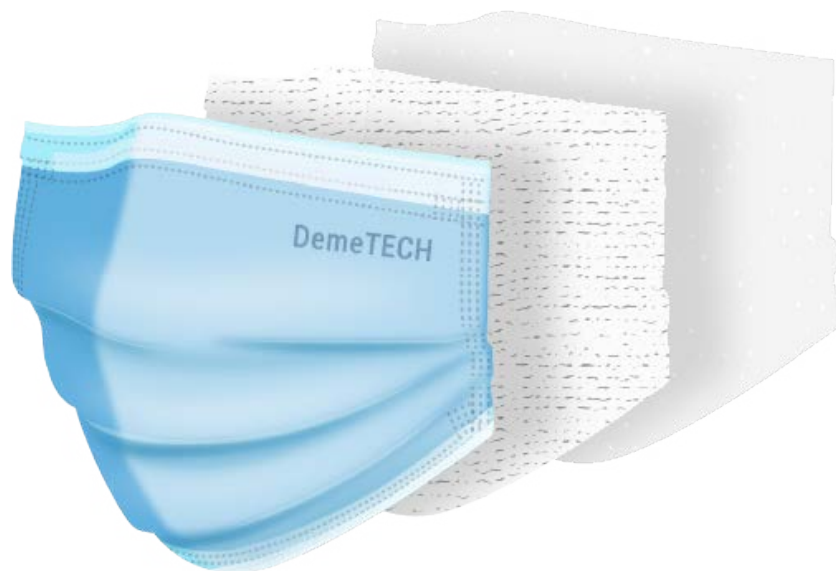

The DemeMASK disposable mask is a fantastic protective barrier against external pathogens. It is recommended for use in common environments such as school, work or the supermarket. If the contaminants are more dangerous to health, a respirator should be used.

**Breathable:** Innovative filter technology allows for high breathability.

**Protective:** While fashionable in black color, the mask retains a 98% filtration rate.

**Fashionable:** The colored mask matches any outfit according to your preference.

### Filters at least 98% of airborne particles and bacteria.
