Blocksi Manager Platform Suite

Admin Dashboard

AI Adaptive Content Filtering

Proactively manage internet access on devices with a highly scalable solution. Includes rapid content distribution, unlimited bandwidth, real-time analytics, extended data storage, user-specific insights, and BYOD filtering.

Perks:

- Anti-theft device
- Threat Detection
- Time-based penalty box
- Granular reporting

Teacher Dashboard

Real-time Screen Monitoring

Effortlessly control your classroom with the ability to manage, monitor, and freeze student devices. Filter content, share screens, and engage in live, interactive chats with students, whether in or out of school.

Perks:

- Videoconference calls
- AI Quiz Generator
- AI Plagiarism Detector
- Automated Class Scheduler

Delegate Dashboard

Ease the Workload for Sys Admins and Assist in Web Filtering

Gain comprehensive district-wide insights and analytics tailored for principals. Easily track school performance on a per-student or per-group basis without the need for technical complexity. Customize notifications to promptly receive alerts for any concerning events via email or phone.

Parent Dashboard

Involve Caregivers in Monitoring Online Activities

Empower parents with the ability to apply more stringent policies managed by the school when the device is at home. Exercise control over access times for streaming, games, and social media, incorporating bedtime and screentime restrictions.

Proven Track Record: Trusted by Authorities and Satisfied Users
