

Beacon has prevented an estimated 18,623 students from physical harm since March 2020.

51 K educators use GoGuardian Beacon to alert when a student is at risk of suicide, self-harm, or potential harm to others.

Unlike other tools, Beacon reviews all content on a website, not just language and content entered into a browser by a student.

87% of educators say their students and school/district communities are safer because of GoGuardian Beacon.*

90% of district leaders say that Beacon easily interacts/integrates with students' and teachers' devices.*

“ I believe GoGuardian Beacon has saved lives.”

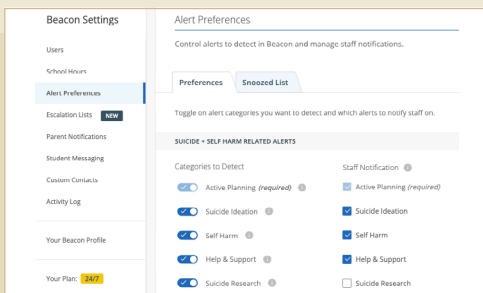

Dave Peterson, IT Coordinator
Sunnyside School District (WA)

“ School mental health professionals have enormous caseloads, and they can't possibly monitor every student. GoGuardian Beacon alerts are sent to them as soon the system detects at-risk behavior, so staff can intervene when they are needed most.”

Dave Peterson, IT Coordinator Sunnyside School District (WA)

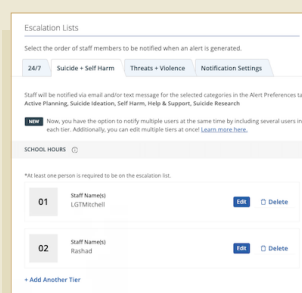

With Beacon, you can customize who, how, and when alerts are received more than any other K-12 safety tool.

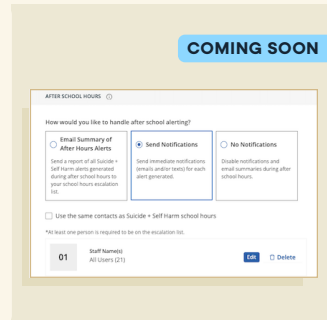

Adaptable Alert Configurations

Easily customize alerts to monitor what matters most and adjust notification frequency to fit your team's workflow.

Unrivaled Escalation List Management

Decide who gets notified and when — during or after school hours — and turn off notifications anytime. Coming soon: Access and receive a consolidated email summary of after-hours alerts.

Our expert team offers guidance for easy set-up and implementation so both your students and school are protected.

Easy set-up: We provide the right tools and step-by-step guidance to help you seamlessly integrate Beacon into your safety plan.

Our implementation kit includes:

- Implementation set-up guide
- Letter templates to the community about the use of Beacon and monitoring hours
- Best practices for alerts across categories
- Alert response templates that can be customized by each district
