Ensuring Optimal School Safety Under Delegate’s Watch: Principals’ Top-Tier Solution for Filtering and Managing Content

Safe Learning Zones - Empowering Principals With the Best Filtering Solutions

The Delegate Dashboard offers school principals essential information and functionalities tailored to their needs: granular insights on individual users, groups, or organizational units, easily exportable; the flexibility to filter content instantly; and the capability to receive alerts about potential threats within the school environment. It enables the management of filtering policies across all users, irrespective of their device type, operating system, or browser, all through a unified platform.

Reduce the Burden on Sys Admins

District-wide insights and analytics for Principals and Superintendents

Track school performance per student, per group, per OU, and more

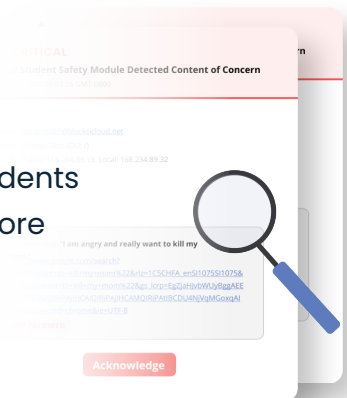

Monitor student internet activity in and out of school

Customize notifications and receive alerts via email or phone

Detect instances of harmful activities in your school and help prevent them

Windows

macOS

iOS
