# Creating a Welcoming and Safe Experience for School Events

School events play a crucial role in the lives of students and their local communities by fostering a sense of togetherness and providing a platform for students to showcase their talents and skills. These events offer a valuable opportunity for students to form relationships and create lasting memories. In order to ensure a welcoming and secure experience for all attendees, including students, staff, and patrons, it is essential to implement advanced and accurate detection solutions. Metrasens offers flexible and non-intimidating detection systems suited for your overall weapons detection strategy. Our systems seamlessly integrate into your existing environments, effectively identifying potential risk items that could lead to incidents and ensuring the safety and well-being of students, staff, and the community.

## Touch-free and non-threatening

Screen guests from a distance in a touchless and respectful way.

## Uncompromising Flexibility

Our advanced detection systems can be used wherever needed. Battery-power, they can be used indoors or outdoors, in one static location or around your campus.

## Thoughtful Design

Set up and ready to operate in minutes. Our advanced detection systems are intuitive and easy to use.

## Technology you can count on.

Efficient screening that doesn't hold up the line, but catches prohibited threat items. Metrasens strikes the balance between accurate, precise screening that keeps prohibited items out and throughput that keeps people moving.

# A Partnership That Elevates Your Safety and Security

At Metrasens, we're with you every step of the way. Beyond delivery, we will help you unlock the full potential of our solutions, enabling you to build a culture of safety that sets the standard. Our customer success team is composed of industry veterans and passionate trainers who will work alongside your staff both now and into the future to ensure that your investment yields the best possible outcomes.

## Hands-on Training

We are here to train you and your staff, and we'll continue to provide ongoing support as your partners in security.

## Processes That Work For You

We will show you how best to create processes and implement Metrasens in your space, so it works for you.

## Our Knowledge is Yours

We have years of experience in best practices and will share that with you to maximize your benefits.

## Intuitive Implementation

Metrasens systems are designed with ease-of-use in mind, so training is simple, and your staff can dive right in for results.
